

BCEQ Earth Day 2030 Goals - What Should We Be Celebrating in 10 Years?

1. A Billion Trees!
2. Completed Bronx Greenway!
3. Tibbetts Brook, daylighted
4. Harlem River Greenway
5. Every project adopts [BCEQ Low Impact Development](#) doctrine
6. “Nature first” land use: how much nature does every site and neighborhood need for clean air and water?
7. Enough Green Infrastructure to capture all the CSO we need
8. Zero stormwater discharge from concrete, asphalt, and paving
9. 8” storm requirements for stormwater management
10. NYC adopts the Harlem River Watershed for inter-agency coordination and planning
11. Community Advisory Committees by sewershed--for GI planning (because water flows *across* Community Districts)
12. Lower depth requirements so GI can be built on rocky ground
13. Shorter food miles; more community gardens
14. Reduction in particulate matter and asthma rates through reduced truck idling
15. Mitigate sensitive asthma rates in the South Bronx with GI
16. Brownfield Cleanups in sensitive Asthma areas
17. Clean Asbestos Removal methods in sensitive asthma areas
18. Fishable Swimmable standards for all waterbodies.
19. Living Shorelines and wetlands on every waterfront
20. More docks on the Rivers
21. More Boats and Boat Houses
22. Recreational access and local economic development in the Harlem River Brownfield Opportunity Area
23. More Public Parkland
24. Living classrooms--outdoor sites--for every Bronx school; environmental projects for every class
25. More rewards for environmental teachers
26. A Green workforce
27. Green Infrastructure and Living Shoreline apprentice programs for high school grads
28. A strong environmental stewardship organization for every community
29. Green Roof Garden/Farms
30. BCEQ’s next generation

30 for 30
