

Bronx Council for Environmental Quality

Comments on the Harlem River Yard PEAKER Draft Air Permit Renewal

We, the undersigned, demand the New York State Department of Environmental Conservation not re-issue the Air Quality Permit Renewal for the New York Power Authority for the Harlem River Yard Peaker Power Plant in the Mott Haven neighborhood of the Bronx. The renewal application does not comply with key provisions of New York State's Climate Leadership and Community Protection Act. The Agency should hold a Public Hearing to explain why this renewal is complete, how it is within the parameter of the original permit, and how they will mitigate the addition emissions adverse health impact on Bronxites; as well as other questions from the public.
